

ECP in Lille,

activities and points of interest

Lille

Aphaeresis unite

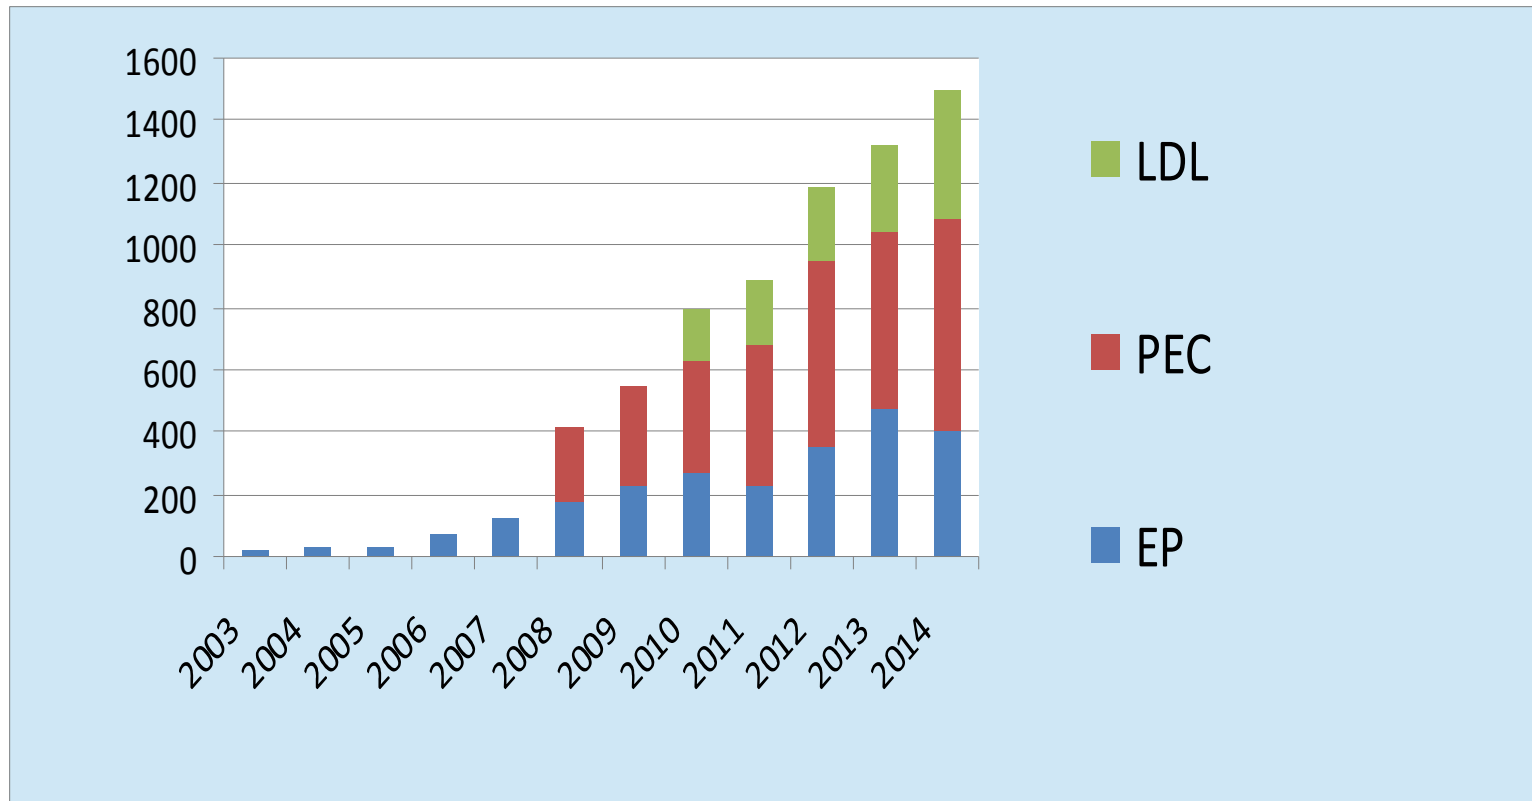

Teaching Hospital
In a department of nephrology

Plamsapheresis unite
Plasma exchange
Immunoadsportion
LDL-apheresis
and extracorporeal photopheresis

Therakos design.

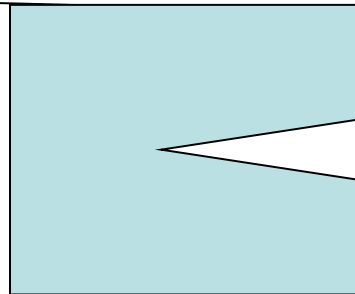

Activities

Focus in ECP

3199 run
103 patients
600/year

ECP haematology

- GVHD is 61% of all the activity, represent 1892 séances, in 57 patients.
- Indication:
 - GVHc: 1800 séances (95%), 40 patients
 - GVHa: 62 séances (3.3%), 6 patients
 - ECP for GVH prevention: 30 séances (1.6%), 4 patients.

Contacts

Adults:

- Dr L. Magro
- Dr V. Coiteux
- Pr I Yakoubaga

Paediatrics:

- Dr E. Deberanger
- Dr B. Bruno
- Dr A. Lahoche

ECP dermatology

- Dermatology represented 32% of all the activity with 1013 séances, in 34 patients,
 - Cutaneous lymphoma (Sezary): 606 séances (59%) 17 patients
 - Atopic dermatitis: 178 séances (18%), 4 patients
 - Others (lichen planus, cutaneous lupus, corn, mucinos): 229 (23%)

Contacts:

- Dr O. Carpentier
- PHD D. Staumont
- PHD L. Mortier

ECP solid allograft transplantation

- Allograft transplantation 7% of total ECP activity, 289 séances and 13 patients:
 - BOS after lung transplantation: 224 (77.5%) séances, 9 patients
 - Chronic rejection after kidney transplantation: 65 (22.5%), 4 patients.

Contacts:

- Kidney transplantation:
 - * Dr A.Lionet
 - * PHD M. Hazzan
 - *PHD C.Noel
- Lung Transplantation:
Hopital Fosch Paris

Points of interest.

- **Retrospectives studies for analyse our medical practices with :**
 - Haematologist (L. Magro Lille),
 - Dermatologist (Cutaneous cell lymphoma-O Carpentier; atopique dermatitidis D. Staumont Lille)
 - and lung transplantation (C. Picard Paris)
- **Contribution in national Protocol**
 - ECP in prevention of acute GVHD after Stem cell allograft transplantation. PHD Michalet & Dr O. Hecquet Marseille.
 - ECP in relapse or refractory non cutaneous T lymphoma. Dr R.Gressin Grenoble.
- **Contribution in national retrospective study:**
 - ECP for chronic allograft néphropathy. PHD AE Heng Clermont-ferrand. 19 patients.

Conclusion

- Young team in a nephrology unit.
- Retrospective analyses of our clinical practices.
- Small contribution in Clinical researches
- Kidney transplantation.
